

A Roadmap for a Successful Stakeholder Process

Participants

- *Michael Champley*, Commissioner Emeritus, Hawaii
- *Cindy Schonhaut*, Consumer Advocate, Colorado
- *Elizabeth Upchurch*, Senior Program Manager,
Stakeholder Relations, Tennessee Valley Authority
- *John Sterling*, SEPA

Purpose: Distributed Generation Integrated Value (DG-IV)

- ❖ Develop a methodology to value distributed generation such as rooftop solar

- ❖ Facilitation provided by

- ❖ Te  **SEPA**TM

solar electric power association

- ❖ Balanced group of stakeholder participants:

 **EPRI** | ELECTRIC POWER
RESEARCH INSTITUTE

- *National Lab*

Stakeholder Facilitation Plan

- Develop group consensus around the value streams to include in the DG-IV and on the methodology to calculate them
- Focused on education and areas of agreement first, then moved on to areas of disagreement
- Homework assignment – identify initial group thinking on major valuation categories
- For each, stakeholders would define if they were:
 - A. Applicable and quantifiable
 - B. Applicable but not currently quantifiable (placeholder)
 - C. Applicable but belongs in public policy discussion, not this methodology
 - D. Not applicable

DG-IV Stakeholder Working Group Results

✓ **Strong consensus on many value components allowed group to focus on areas of agreement to start**
