

Exercise on Regional Energy Regulation

A commissioned report on regional energy integration lists the following as the key challenges to the attainment of a well-functioning integrated energy sector to underpin economic growth.

PART A:

As a regional regulator which of these would you rank as the top four (4) priorities?

Challenge		Group 1				Group 2				Group 3				Group 4			
1	Non cost-recovery tariffs																
2	High levels of unemployment and poverty																
3	Inadequate transmission interconnections																
4	Unexploited regional energy potential																
5	Inadequate supply capacity																
6	Inappropriate/immature industry/market structures																
7	Regulatory incompatibility among countries																

PART B:

Assuming that you as regulator are fully empowered and have adequate technical capacity, discuss two (2) measures or initiatives that you, as regional regulator, would take to tackle each of the 4 priority areas you have selected.

Priority		Measures/Initiatives Proposed
1.		
2.		
3		
4
