

FOCUS ENERGY SOLUTIONS LIMITED

Focus Energy Solutions Ltd was set-up here in The Gambia in 2010 as a subsidiary of Green link B.V. based in The Netherlands who has a wealth of experience in renewable energy.

WHAT IS FOCUS ENERGY SOLUTIONS Ltd

With this company, we aim to provide a reliable energy supply for our customers, based on mainly renewable energy. Therefore we work with a 3 step model to design an energy system, the

TRIAS ENERGETICA.

Step 1

It goes without saying that reducing consumption in itself is the goal. The reduction of energy demand should not be based on loss of comfort or function.

Step 2

USE SUSTAINABLE ENERGY

Ie. use natural resources wherever possible at any level, combined with reliable energy choices

Use conventional energy with maximum efficiency, compensate.

If needed, this could be met by applying fossil fuels as efficiently as possible

Street Lighting 78 Watts as compared to 300 watts
SPOT Lights 3.5 Watts
Fluorescent tubes 11 watts (no starters)

Esyst Gambia Ltd

Solar friendly computers

- They consume 40 watts as compared to the 150 watts conventional desk tops
- Limited space required as they can be hidden behind the monitor
- No moving parts, robust and fit for the tropical weather
- Same price as compared to the normal desk top or lap top

Projects

Among the projects we have done include reliance financial services, Trust Bank, The RVTH sanatorium, NICE Gambia, private homes etc etc.

LEASING OPTIONS

We currently are testing the possibility of leasing solar home system

Projects in The Gambia

Prior to the setting up of the company, Green link BV has done many solar energy projects which includes the setting up of NICE Gambia the first internet cafes powered by solar.
