Flying Eye Photo

A collage of five images representing sustainable energy and green buildings. From left to right: a row of white wind turbines against a blue sky; a blue and white Toyota Prius with 'Hybrid Synergy Drive' text; a close-up of solar panels; and a modern stone house with large windows and a green roof.

-
- A photograph of a modern, multi-story school building with a large, colorful playground in the foreground. The playground features a large slide, a climbing structure, and a swing set, all set on a green artificial turf surface. The building has a warm, terracotta-colored facade and multiple balconies.

A blue bicycle sculpture is the central focus, set in a courtyard. The sculpture is a tandem-style bicycle with a large front wheel and a smaller rear wheel. A person is seated on the rear seat. The courtyard has a light-colored paved ground and a bed of brown mulch with small green shrubs and pink flowers. In the background, there is a tan building with a large window and a dark metal frame.
