

. . . .

#### MAIN ELEMENTS OF TARIFFS WHICH ARE SUBJECT TO REVIEW BY SERC

## ZDRAVKA ZHELEVA State Expert Economy Regulation Directorate

### **Tariffs Determination Principles**

Equal footing of energy companies
Justified costs and reasonable profit
Prohibition for cross-subsidizing among the different groups of users

#### **Regulation Method**

# Cost plus: Costs approved of by SERC Regulated return on assets

#### **Price-formation Elements**

Return - Return base Rate of return Conditionally fixed costs Variable costs Quantities for generation, transfer and distribution

#### Return

#### Return base (RB)

- Fixed assets directly related to the activities under the license
- Financing for fixed assets
- Working capital

#### **RB** = FA+ FNtgA – Ctfa – Ffa + WCI

#### Return - continued

# Rate of return (RR) – Own capital RR – Loan capital RR

#### **Conditionally Fixed Costs**

 SERC guidelines regarding the groups and types of costs, which are subject of approval

- Determined on the basis of an estimate for the relevant regulatory period

 Determined as a totality and separately for the different types of activities

 Costs are directly related to the activities under the license

#### Variable Costs

- Directly dependent on the quantity of generated, transferred and distributed energy
- Determined on the basis of estimates for generation and consumption

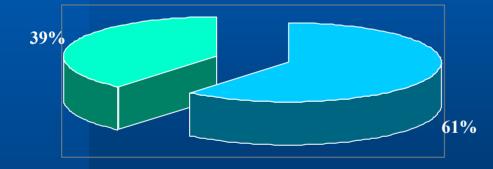

#### **Technological Losses**

# For each regulatory period the SERC approves the percentage of:

- Technical
- Commercial

## **Consumption Structure in the Energy Sector**

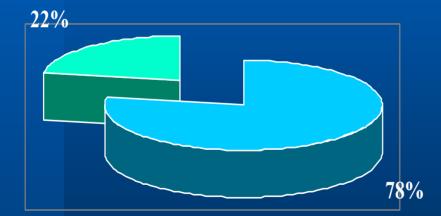

2003 г.

Non-residentialResidential

# **Consumption Structure in the Thermal Energy Sector**

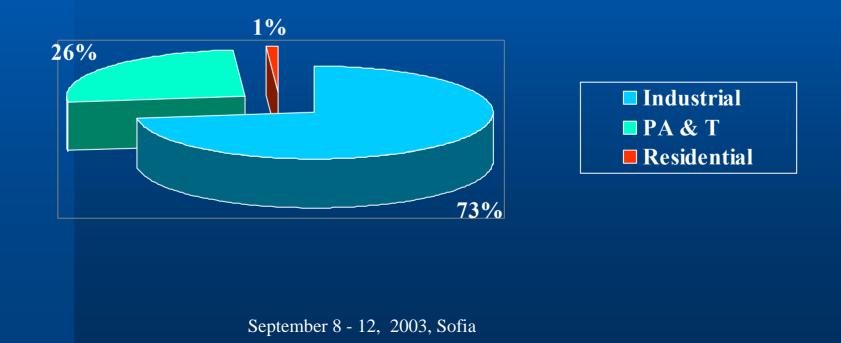

2003г.

# **Consumption Structure in the Natural Gas Sector**

2003 г.

**Classification of Tariffs for End Users in the Electric Power Sector** 

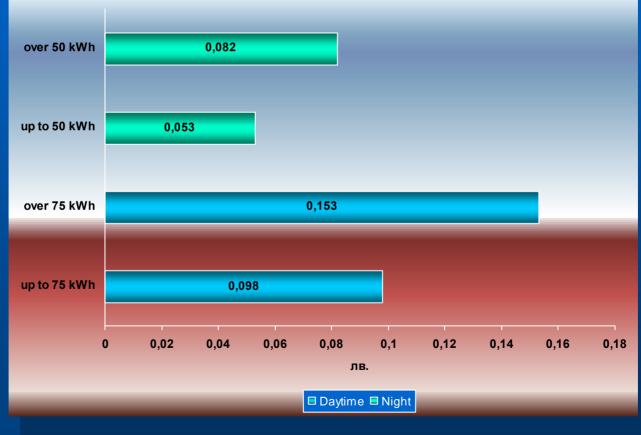

Criteria Voltage - High voltage - Medium voltage - Low voltage • Time tariffs over 24 hours - Peak - Daytime - Night

- Non-differentiated

#### **Special Tariffs**

- Tariff for weekends and holidays for users:
  - Connected to the transfer network
  - With annual consumption over 50 million kWh
  - Regular payers to the NEC EAD
- Street lighting

# Prices of electric power used for household purposes in force since July 1,2003 (BGL/kWh)

# **Thermal Energy Prices**

- For business users approved of by SERC
- For residential users for heat distribution companies subsidized from the state budget the prices are set by the Council of Ministers

#### **Natural Gas Prices**

- Uniform prices for natural gas transfer by the gas transfer companies to all users
- Regional prices for natural gas distribution per groups of users
- Actual price levels and differentiation among the different groups of users of the gas distribution companies

**Future Developments** 

New methods for price regulation
 Criteria for cost efficiency
 Supplies quality

## **THANK YOU!**
