

Resolution Honoring David C. Boyd of Minnesota

WHEREAS, In 2007, an unassuming chemistry professor was yanked, Indiana Jones-like, from the gently ivied halls of the University of St. Thomas and given the mantle of the Chair of the Minnesota Public Utilities Commission, little realizing the adventures ahead of him; *and*

WHEREAS, Chair Boyd's intellect, warmth, and zest for the unknown made him an easy mark for colleagues in search of chairs for sundry committees large and small; *and*

WHEREAS, These qualities drew David to NARUC's Committee on Electricity, to leadership in the Subcommittee on Nuclear Issues, the Nuclear Waste Strategy Coalition, the Subcommittee on Education and Research, the National Regulatory Research Institute, and eventually to the Chair of the Committee on Electricity, and in all of these capacities David led with vision, clarity of purpose, and a subtle twist of the arm; *and*

WHEREAS, David's relentless willingness to say "yes" brought him quickly into the inner circle of the Organization of MISO States, the Upper Midwest Transmission Development Initiative, the Cost Allocation and Regional Planning Group, the Mid-America Regulatory Conference, the Electric Power Research Institute, and the Eastern Interconnection States Planning Council, assuming significant leadership roles and achieving positive outcomes in each organization, developing a principle of "if it has an acronym, join it;" *and*

WHEREAS, These qualities also led to David's readiness to undertake international exploits under the guise of the Black Sea Regulatory Initiative, the ERRRA Investment Conference, Vice Chairman of the International Confederation of Energy Regulators (ICER) and speaker at the Berlin Seminar on Energy Policy, leading his family to believe him to be an international man of mystery, seemingly supplying marshmallows to Moldova while jetting to hotspots across the globe (if they weren't hotspots before his arrival, they were shortly after he arrived); *and*

WHEREAS, In reality David's international service has produced demonstrable progress toward the goals of NARUC and USAID, and for which David was recognized with the 2013 Terry Barnich Award for Promoting International Cooperation Among Utility Regulators and Development of Professional Regulation; *and*

WHEREAS, These NARUC activities did not detract from David's advancement of good regulation in Minnesota, offending utilities, landowners, transmission developers, and windfarm developers in equal measure; *now, therefore be it*

RESOLVED, That the Board of Directors of the National Association of Regulatory Utility Commissioners, convened at its 2015 Winter Committee Meetings in Washington, D.C., honors David Boyd on the completion of the regulatory phase of his public service, commends his many contributions to effective and purposeful regulation, and wishes him well in his next endeavors.

*Sponsored by the Committee on Electricity and the Committee on International Relations
Adopted by the NARUC Board of Directors February 18, 2015*
