

**NARUC**

**New Opportunities for  
Nuclear Energy**

**July 2022**

# ABOUT OKLO

---

Developing small advanced reactor systems

Inherently simple and robust designs

Highly resilient and affordable power generation

Flexible siting with minimal water resources required

First plants produce up to 15 MWe

10-20 years of operation with each refueling

Plant design and operations have been demonstrated before

# NEW OPPORTUNITIES

---

Behind the meter generation

Cryptocurrency mining

Industrials

Heating

Energy resilience

*Voltage regulation*

*Black start*

Fuel recycling
